Carol Hanlon, DOE  
Yucca Mountain Site  
Characterization Office  
(M/S #025)  
North Las Vegas, NV 80036-0307

Dear Ms. Hanlon,

Thousands of comments from the public on the environmental impact of the Yucca Mountain Site as a nuclear waste dump are still waiting to be addressed. Without a Final Environmental Impact Statement, a detailed transportation scenario or a licensing rule, the DOE lacks the basis for evaluating the site's environmental suitability. The procedure for evaluating it is very flawed and does not respect public opinion. I urge you to abandon the Yucca Mountain project.

Sincerely,

Aimee Lykes
